# ***DOM Mission/End State***

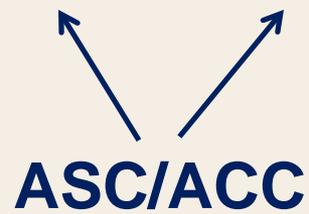

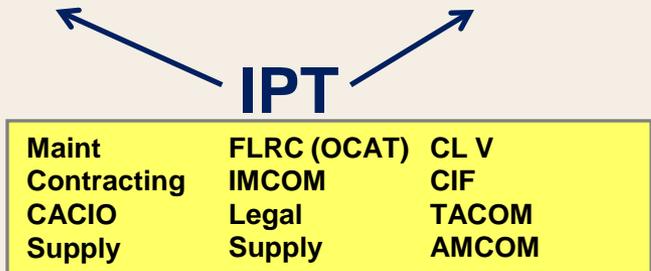

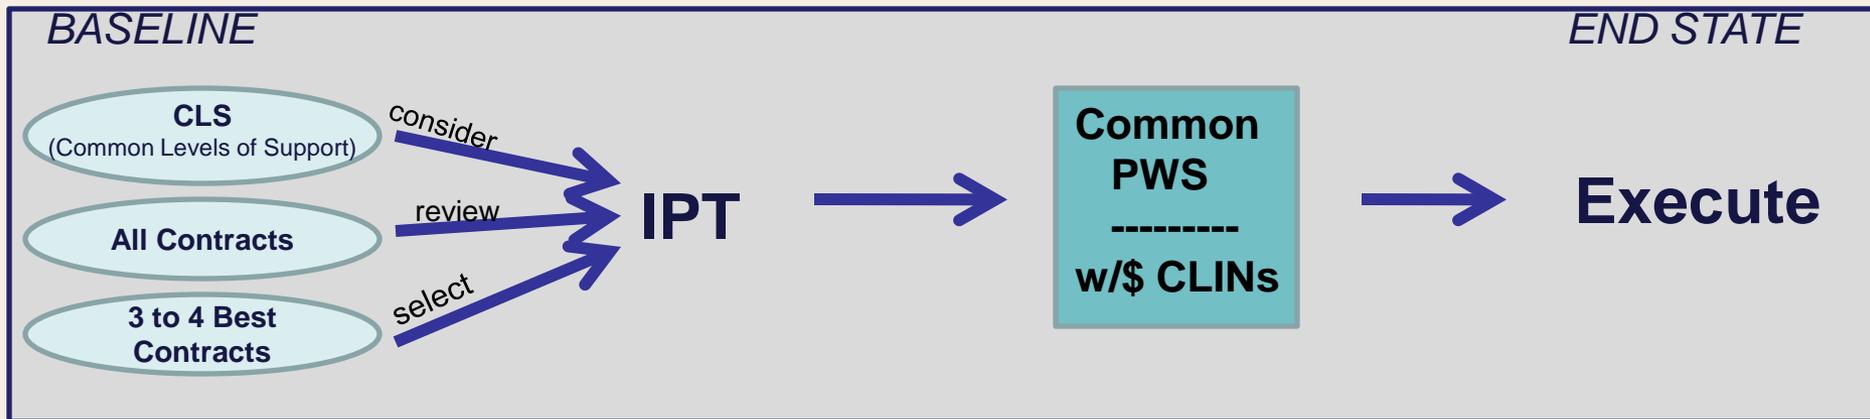

**Mission:** ICW IMCOM establish the Directorate of Materiel (DOM) and the Directorate of Support Services (DOSS) at camps, posts, and stations to align transferring Materiel Enterprise functions of supply, maintenance, and ammunition from IMCOM to AMC.

---

**DOM Vision of End State:** The purpose of the Directorate of Materiel is to provide one Source for Repair and materiel leveraging contract/workforce flexibility for responsive expansion and/or contraction of capabilities, exercising quality, best practices, and government oversight.

# Path to Long-Term Acquisition Strategy

# Why We Are Doing This

## Example 1: Ft. Riley

New Installation paint booth  
\$2.5M requirement identified

VS

Use/leverage existing 3-yr old  
FLRC paint booth

## Example 2: Ft. Stewart

Two maintenance contracts  
supporting DOL & FLRC...  
same contractor!

## Example 3: CL IX

Both FLRC and DOL  
operate CL IX turn in points  
on same location

### **Benefits:**

- Efficiency of scale*
- Eliminate redundancy*
- Reduced government oversight*
- Reduced contract management*
- Cost Savings*
- Standard processes/metrics*
- Standard quality*
- Total visibility...cost, time, & performance*

But the way ahead...  
also includes:  
**Challenges**

# DOM Challenges

- Timely implementation 
- Lack of consistent processes at installations

- Potential for additional resource requirements
- Request for waivers at small installations
- Joint base anomalies
- Reluctance to change
